AF3000 DATASHEET

Manufactured Using a unique process AF3000m Material is the World-Wide Standard supplied and installed by Pfaudler and Chemical Reactor Services. AF3000 satisfies the specific requirement to seal glass lined vessels and pipe work without fear of damaging the flanges.

PROPERTY	TYPICAL DATA
CD TensiteN /mm2(psi)	3.74(s4r)
Density gl" t	0.66
Compressibility - o/n @34.5 N/mm2	30-45
Recovery - 7o minimum	20
Max. Operating Temperature oC	230
Water Absorption - o/o / 24 hrs	25 max
Maximum Load - N/mm2	<=70
Minimum Load to Seal - N/mm2	<=4
Typical Values based on 3.2 mm thickness
